To the patient: Please read this entire document prior to signing it. It is important that you understand the information contained in this document. Please ask questions before you sign it if there is anything that is unclear.

The nature of chiropractic treatment: The primary treatment I use as a Doctor of Chiropractic is spinal manipulation therapy. I will use that procedure to treat you. I may use my hands or a mechanical instrument upon your body in such a way as to move your joins. That may cause an audible "pop" or "click", much as you have experienced when you "crack" your knuckles. You may feel a sense of movement.

Analysis/Examination/Treatment: As a part of the analysis, examinations, and treatment, you are consenting to the following procedures if indicated in your treatment, spinal manipulation therapy, ultrasound/laser therapy, hot/cold therapy, electrical stimulation, exercise, massage therapy, graston technique, spinal decompression, radiographic studies, range of motion testing, muscle strength testing, palpation, orthopedic testing, postural analysis, vital signs, basic neurological testing, EMS.

The material risks inherent in chiropractic treatment: As with any healthcare procedure, there are certain complications which may arise during chiropractic manipulation therapy. These complications include but are not limited to: fractures, disc injuries, dislocations, muscle strain, cervical myelopathy, costovertebral strains and separations, and burns. Some patients will feel some stiffness and soreness following the first few days of treatment. I will make every reasonable effort during the examination to screen for contraindications to care; however, if you have a condition that would otherwise not come to my attention, it is your responsibility to inform me.

The probability of those risks occurring: Fractures are rare occurrences and generally result from some underlying weakness of the bone which I check during the taking of your history and during the examination and x-ray. Stroke has been the subject of tremendous disagreement. The incidences of stroke are exceedingly rare and are estimated to occur between one in one million and one if five million cervical adjustments. The other complications are generally described as rare.

The availability and nature of other treatment options: Other treatment options for your condition may include, self-administered, over the counter analgesics, and rest, medical care and prescription drugs such as anti-inflammatory, muscle relaxants and pain-killers, hospitalizations, and surgery. If you choose one of the above noted "other treatment" options, you should be aware that there are risks and benefits to such options and you may wish to discuss these with your primary medical physician.

The risks and dangers attendant to remaining untreated: Remaining untreated may allow the formation of adhesions and reduce mobility which may set up a pain reaction further reducing mobility. Over time this process may complicate treatment making it more difficult and less effective the longer it is postponed.

Please check appropriate block and sign below.

I have read ( ) or have had read to me ( ) the above explanation of the chiropractic adjustment and related treatment. I have discussed it with the doctor and have had my questions answered to my satisfaction. By signing below I State that I have weighed the risks involved in undergoing treatment and have decided that it is in my best interest to undergo the treatment recommended. Having been informed of the risks, I hereby give my consent to that treatment.
